ASSIGNMENT #1

Date Given: September 26, 2022

Due: October 9,2022

Weight: 20%

Introduction

Creating a simple HTML website indicates that an Internet Authoring student has started acquiring the needed skills to be a capable website designer. In this assignment, you are required to create a one-page website for a business consisting of four sections. The web page should have the following content:

1. An image gallery containing no less than four pictures
2. A nested list (ordered/unordered) OR a description list
3. A table
4. A form, with control elements, including text input, radio buttons, check boxes and a submit/reset button.
5. A hyperlink to another website
6. A heading showing the name of the business
7. A background image for the web page.

The business must display some product or service using HTML code only (CSS will be used in an upcoming assignment). The website page must have an overview of the company, contact information and address.

Submission Guideline:

Upload your assignment on Moodle. Place all pieces of your work into one folder. Zip the folder and save the zip folder in the format ITT208_CWK1_Enter your full name.

Penalties will be applied for late submission (5% per working day), and extensions are *only* allowed in cases of *bone fide* and documented extenuating circumstances.

MARKING SCHEME FOR THE ASSIGNMENT

Assessment	Criteria	Marks Awarded	
Section A	The webpage consist of all 5 contents; An image gallery with at least four pictures, a nested list, a table, a form, a hyperlink to another website and a background image on your web page.	[13-20]	/20
	The website consists of four or three contents. The content should be either an image gallery with at least four pictures, a nested list, a table, a form, a hyperlink to another website or a background image on your web page.	[8-12]
